PROFESSIONAL SUMMARY

Motivated Java Backend Developer with a strong foundation in Object-Oriented Programming, database management, and web application development. Experienced in building scalable backend systems and e-commerce platforms using Java, JDBC, Servlets, and MySQL. Familiar with Spring Boot fundamentals and REST API design principles. Passionate about writing clean, efficient, maintainable code and continuously enhancing backend engineering skills.

TECHNICAL SKILLS

Programming Languages: Java, SQL

Backend Technologies: JDBC, Servlets, JSP, Spring Boot (Basics), REST API Design

Database: MySQL – CRUD operations, schema design, query optimization

Core Concepts: OOP (Encapsulation, Inheritance, Polymorphism, Abstraction), Data Structures, Exception Handling

Web Technologies: HTML5, CSS3, JavaScript (Basics)

Tools & Platforms: Git, GitHub, Eclipse, IntelliJ IDEA, Postman, Maven

INTERSHIP EXPERIENCE

Java Programming Intern | Systemtron (Online)

Aug 2025 – Sep 2025

- Implemented core Java applications using OOP principles, exception handling, and Java Collections Framework
- Developed backend logic for real-world programming scenarios, improving code reliability and efficiency
- Gained hands-on experience in debugging, code optimization, and writing clean, maintainable Java code
- Strengthened problem-solving and software development practices through structured mentorship

PROJECTS

Airline Management System | Java · JDBC · MySQL · OOP

- Designed and implemented a backend system to manage passenger records, ticket bookings, and flight scheduling
- Developed full CRUD operations using JDBC and MySQL, ensuring efficient and accurate data persistence
- Applied OOP design principles (encapsulation, inheritance, polymorphism) to build modular, reusable components
- Implemented robust exception handling and input validation, improving system stability and reliability
- Designed a clean database schema with optimized SQL queries for fast data retrieval

E-Commerce Web Application | Java · HTML5 · CSS3 · JDBC · MySQL

- Built a responsive e-commerce platform with Java-backed architecture and modern HTML/CSS frontend
- Implemented product listing, user profile management, wishlist, and navigation features end-to-end
- Designed backend-ready API architecture to support scalable integration with external services
- Applied REST API design principles for clean client-server communication patterns
- Focused on performance optimization, clean code structure, and maintainability

CERTIFICATIONS & TRAINING

Java Full Stack Development Training | Blue Ball Technologies

Merit-Based Selection

- Competitively selected for Full Stack Java Development training based on academic merit
- Completed training in Java, Spring Boot, JDBC, HTML, CSS, JavaScript, and backend web development
- Built multiple full-stack applications as part of the program, reinforcing end-to-end development skills

EDUCATION

B.Tech in Computer Science & Engineering

2022 – 2026

Dr. MGR Educational & Research Institute | CGPA: 7.0

Higher Secondary (Class XII) – 69%

2021

Maria Matriculation & Higher Secondary School
